

PFT RENDER STAR

The problem solver of the stator family

The special, soft rubber compound and the special geometry is designed for the rugged use in the area „job site mixture“. Also in the area of stiff material with coarse grain, this stator can be used.

TECHNICAL DATA

Stator	00 53 67 57
Rotor	00 53 67 58
Conveying output	max. 100 litre / min
Conveying pressure	max. 20 bar
Coneying distance	max. 30 m
Grain size	max. 6 mm
Geometry	special
Rubber mixture	soft
Stator type	maintenance-free
PIN	with PIN
