

# PFT C 4-2 *soft*

## The user-friendly, adaptable solution in the PFT rotor/stator system

The combination of the C4-2 hard cast iron rotor and the C4-2 soft stator is the solution for special material applications. The soft stator uses a softer elastomer compound that can handle large grain sizes better. Thanks to the lower preload, the system also conveys challenging materials.

### TECHNICAL INFORMATION

Stator	00821651
Rotor	00194807

### TECHNISCHE DATEN

Conveying output	18 l/min
Conveying pressure	max. 18 bar
Conveying distance	15 m bei DN25
Grain size	max. 4 mm
Stator type	maintenance-free
Connection type	C
Rubber hardness	soft
Stator length/ Ø	295 mm / 60 mm

### ADVANTAGES AT A GLANCE

- Ideal up to 4 mm grain size
- Easy handling - maintenance-free
- Highly wear-resistant rubber compound
- No time-consuming clamping - Preload is stored in geometry
- For special and challenging materials
